REACH REGISTRATION.

The European Regulation (EC) 1907/2006 regarding the **Registration, Evaluation, Authorisation and Restriction of Chemicals** (REACH) came into force on 1.6.2007

We are aware that REACH will affect all industries to some degree and that manufacturers and importers will now have a duty to register chemicals and/or preparations before the crucial registration date. We are ensuring that we have the appropriate knowledge and understanding to assess our duties responsibly and to advise our customers accurately with regards to the status of all products we supply in relation to the REACH regulation.

We are a downstream user and the goods delivered by us to your company are not chemicals, substances or preparations but articles given form during the production process and this influences the function to a greater level than the chemical composition. These articles do not emit any substances in normal use and also do not contain any hazardous substances above the allowed limits. Due to this no obligation regarding registration is relevant the Turner Electronics Ltd.

Having studied our product inventory we can confirm that we also import articles from outside the EU. We are in communication with these suppliers to raise their awareness of REACH and are seeking confirmation that none of the substances deemed as SVHC are contained within the articles supplied to us above the 0.1% concentration level.

Should you have any further queries regarding the above, please do not hesitate to contact us.
